APH Mission Statement

To promote independence of blind and visually impaired persons by providing specialized materials, products, and services needed for education and life.

APH Corporate Status

The American Printing House for the Blind, Inc. is a 501(c)(3) non-profit organization. Gifts, therefore, are tax deductible.

Core Curriculum and Expanded Core Curriculum by Dr. Philip Hatlen

Core Curriculum

Educators define core curriculum as the knowledge and skills a student should learn by high school graduation. This foundation, for almost all learning, is generally related to academic subjects.

Expanded Core Curriculum

Most professionals firmly believe that visually impaired students need an expanded core curriculum that requires additional areas of learning. Experiences and concepts casually and incidentally learned by sighted students must be systematically and sequentially taught to the visually impaired student.

Note: Dr. Philip Hatlen authored the introductory copy at the beginning of each of the Expanded Core Curriculum sections in this catalog.

Dr. Philip Hatlen is the retired Superintendent of the Texas School for the Blind and Visually Impaired, Austin, and served as an Ex Officio Trustee of APH for many years.

TADPOLE Kit

Tools and Activities for the Development of Visual Skills (TADPOLE) is a set of standardized tools that helps practitioners perform functional vision evaluations or visual skills development activities. It is similar to APH's Tools for Assessment and Development of Visual Skills (ToAD) kit, but is geared for younger learners. TADPOLE is a natural precursor to APH's ToAD Program.

TADPOLE does not provide a formal assessment—there are several excellent assessment tools available. TADPOLE provides materials that assist the educator as he or she performs vision assessments or activities.

TADPOLE also functions as the Vision Modality section for APH's Sensory Learning Kit (SLK).

The TADPOLE *Practitioner's Guidebook* is a collection of suggested activities, primarily for use with students who are very young (0-2 level), or who have communication and/or cognitive delays.

Note: Practitioners should purchase the ToAD kit prior to use of the TADPOLE kit, since items from ToAD are needed when a student's personal items are not available.

TADPOLE Kit Includes:

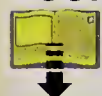

- Object Cards
- TADPOLE Mini-Lite Box overlays
- Report of Visual Skills (10-pack)
- Black & White Coloring Cards (5-pack)
- *Practitioner's Guidebook*, Large Print
- *Tasha Tadpole's Puzzle Book*, Large Print

Notes: Both the *Practitioner's Guidebook* and *Tasha Tadpole's Puzzle Book* are available separately in braille versions. The optional Soft Snap Puzzles are useful with both TADPOLE and ToAD activities.

ToAD: Tools for Assessment and Development of Visual Skills

This set of standardized tools aids in performing functional vision evaluations or visual skills development activities. ToAD does not provide a curriculum—there are several excellent curricula available, including ISAVE (*discontinued*) from APH. The ToAD kit provides tools, toys, and puzzles that assist the educator as he or she performs assessments or activities. In addition to its uses for assessment and for vision development activities, ToAD serves as the Vision Modality for the Sensory Learning Kit.

Recommended ages: 2.5 – 5 years.

Students practice problem solving for:

- Data preparation
- Numeration
- Measurement
- Geometry
- Number theory
- Pre-algebra/algebra

Objectives for each of the above key concepts have been aligned with the Principles and Standards for School Mathematics from the National Council for Teachers and Mathematics (NCTM). These lessons make use of routine, non-routine, and open-ended problems, with writing activities that require students to explain their solutions.

Accessible Formats:

The APH Teacher Guides and Student Books are available in several accessible formats, so that the entire class can work on math together in a multi-media approach. The large print and braille editions include a CD-ROM with an .html file and a Digital Talking Book (DTB) file with built-in player.

The large print student edition includes a specially formatted large print answer document. However, it is recommended that each student have a book in his or her preferred reading medium, and should feel free to mark answers in the test books. Used this way, the student books become consumable items.

What is IT? Kit

The exercises in the What is IT? Kit emphasize the need for the child to form real mental images in relation to labels at a very early age.

Many bright young children who are blind copy the descriptive terminology of others, but have difficulty describing the "why" of the label independently. Teaching the young mind to listen to the word, and anticipate "motor knowledge" (organized physical input) that will help form associations, can make a difference. With an active introduction to details contributing to the whole, the child will gain the foundation for comparative thinking, leading to the ability to generalize and communicate independently.

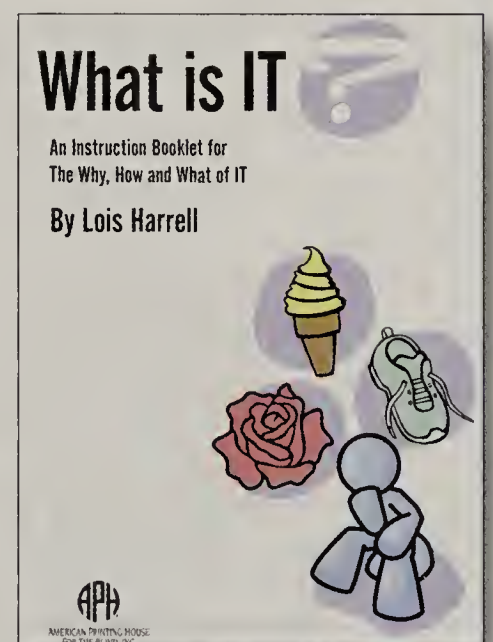

Think about this: Both tables and chairs have "legs" and a flat surface, so what is the difference between them? What do "flat" and "surface" mean? Does "leg" mean table leg, animal leg, or person's leg? Active repetition within the context of daily activities is required to meaningfully tie labels to their many possible associated concepts.

SAM: Symbols and Meaning

This invaluable tool advances our understanding of how to create accessible and meaningful learning activities for children with visual and multiple impairments.

SAM walks you through an understanding of how children expand their knowledge, what helps to bridge learning when there are accessibility challenges, and strategies for meaningful learning interactions.

New!***The Best for a Nest Interactive Storybook***

This large/print braille book includes color illustrations on each page that depict the text. *The Best for a Nest* interactive storybook provides an opportunity for the learner to focus on many concepts: position of objects, prepositional phrases, and use of tactile symbols.

Use of Storyboard

The storyboard should be removed from the book so the child can use the included tactile symbol manipulatives to illustrate what is happening on each page of the book. The child may need assistance when first

placing tactile symbols on the storyboard. It is anticipated that the child will need less assistance as he/she gains experience. Make this experience fun and meaningful for the child.

Manipulatives

Included with the book is a group of manipulatives: birds, nest, eggs, tree, branches, grass, and a cat. The manipulatives are tactile symbols that are designed to assist the child in better understanding the text.

Basic Concepts Can Be Explored

- Counting – the number of branches, eggs, birds, nest, and cat
- Left and Right – as related to the tree, its branches, and positions of the bird(s), and cat
- Comparisons – of lengths of branches and sizes of birds
- Top and Bottom – of the tree and the page
- Around – the tree

Topics for Discussion

- Why do birds sit on their eggs?
- Where do birds go when winter comes?
- What are the seasons of the year (sequence) and their difference?
- Why did the bird want to be safe from the cat?
- What kind of food did the bird find on the ground?

Recommended ages: 2 years and up.

The Best for a Nest: 5-12301-00.....\$75.00

WARNING: Choking Hazard — Small Parts. Not intended for children ages 5 and under without adult supervision.

Included storyboard with manipulatives.

Building on Patterns: Primary Braille Literacy Program — Kindergarten Level

Building on Patterns is a complete primary literacy program designed to teach beginning braille users to read, write, and spell in braille.

The Building on Patterns series addresses vocabulary, fluency, comprehension, phonemic awareness (ability to hear and interpret sounds in speech), and phonics (the association of written symbols with the sounds they represent).

BOP also addresses specific skill areas needed by the child who is blind, such as language development, sound discrimination, tactual discrimination, and concept development. Braille contractions are introduced from the beginning along with sound and letter associations.

Features of Building on Patterns

- Groups of contractions are taught together when logical to do so.
- Easily confused letters and words are introduced at different times.
- Ideas for incorporating technology are given.
- Lessons are flexible and can be adapted to fit a given student or students.
- Punctuation is eliminated except for the capital at the kindergarten level and is introduced gradually thereafter.

Kindergarten lessons include a selection to be read to the student, questions to discuss, and an activity for the child to complete. Textbooks are consumable.

Recommended ages: 4 to 5 years and up.

Note: BOP Kindergarten replaces Patterns Reading Program Readiness Level.

Building on Patterns: Primary Braille Literacy Program — Second Grade Level

Building on Patterns (BOP) is a complete primary literacy program designed to teach beginning braille users all language arts — reading, writing, and spelling.

The Building on Patterns series addresses phonemic awareness (ability to hear and interpret sounds in speech), phonics (the association of written symbols with the sounds they represent), comprehension, fluency, and oral vocabulary, all of which have been identified as important for reading instruction.

This program also addresses specific skill areas needed by the child who is blind, such as language development, sound discrimination, tactual discrimination, and concept development. Braille contractions are introduced from the beginning along with sound and letter associations. Expanded Core Curriculum (ECC) Skills such as using tactile graphics and technology are also included. BOP Second Grade builds on the components of BOP First Grade and contains additional activities.

New Features

- Timed reading in each lesson
- More independent reading suggestions
- Simplified lesson monitoring sheets
- Quick Read for silent reading and reading comprehension practice
- Meet the Authors with information on the BOP writers in each unit

BOP Second Grade includes more worksheets, part-word braille contractions, and other remaining literacy contractions and symbols along with the rules to use them. The curriculum also emphasizes syllables and multisyllabic words, and the effect of certain letter combinations on vowel sounds. For optional map work, each lesson gives the foreign origin of at least one spelling word.

Recommended ages: 7 to 8 years and up.

Prerequisite: BOP First Grade or equivalent skills.

Note: Each print kit includes Teacher's Materials in print; braille kits include Teacher's Materials in braille.

Flip-Over Concept Books: LINE PATHS

The first of a planned series of print/tactile books, uniquely designed by APH.

These concept books provide interactive and independent learning for young children as they build basic concepts and develop early tactile skills. The format of *LINE PATHS* includes tactile and full color panels that can be turned freely until the child finds adjacent panels that match each other, continue a line or pattern, complete a sequence, build an image, and so on.

Continuous Line Path Worksheets are included to allow the child to practice tracking each line type, from start to finish, in a continuous motion before tracking across three separate panels.

Flip-Over Concept Books use a special binding that opens and closes, allowing teachers and parents to:

- Randomize/shuffle the panels within each stack to prevent the child from memorizing the exact location of a panel
- Minimize the number of line paths presented in the book, if needed, for a younger child

Recommended ages: preschool, kindergarten, and early elementary grades.

Flip-Over Concept Books: LINE PATHS: 1-08831-00.....\$50.00

Flip-Over Concept Books: PARTS OF A WHOLE

The second in a planned series. The format of *PARTS OF A WHOLE* consist of tactile, full color panels that can be turned freely until the child finds adjacent panels that match each other, continue a line or pattern, complete a sequence, build an image, and so on.

Introduce and practice these concepts and skills:

- Tactile and visual discrimination of various textures and shapes—sometimes with subtle differences
- Familiarization with basic geometry terms such as symmetry, straight, curved, half, whole, circle, and oval
- Global exploration versus systematic exploration
- Understanding of tactile representation—compare the visual/tactile image to the real object (if available)
- Exposure to basic science terms—e.g., fish (tail fin, dorsal fin, pectoral fin) turtle (shell, head, tail), leaf (stem, veins, blade), etc.
- Tactile/visual matching of similar shapes

Recommended ages: preschool, kindergarten, and early elementary grades.

Expanded Core Curriculum: Visual Efficiency and Low Vision

Visual Efficiency Skills

The visual acuity of children diagnosed as visually impaired varies greatly. With thorough, systematic training, most students with functional vision can learn to use their remaining vision better and more efficiently. Educational responsibility for performing a functional vision assessment, planning appropriate learning activities for effective visual use, and teaching students to use their functional vision effectively and efficiently falls to the professionally prepared teacher of visually impaired learners.

Expanded Core Curriculum: Orientation and Mobility (Concept Development)

Orientation and Mobility

This is a vital area of learning, which requires delivery by teachers with specific preparation. It emphasizes the fundamental need and basic right of visually impaired people to travel as independently as possible, enjoying and learning to the greatest extent possible from the environment through which they are passing. Students will need to learn about themselves and the environment in which they move — from basic body image to independent travel in rural areas and busy cities.

PARTS Tactile Town: 3-D O&M Kit

Tactile Town provides an interactive, three-dimensional model to help teach spatial concepts and environmental layouts.

This kit assists in the development of cognitive mapping skills by helping students who are visually impaired and blind perceive and organize their physical environment specific to concepts such as street layouts, intersections, route patterns, city block arrangements, etc. It encourages active participation and interaction with displayed map layouts so that concepts and skills, not conveniently accessed through real-life exploration, can be learned and practiced.

Tactile Town is designed to be inviting to both tactile and visual learners, with attractive pieces incorporating contrasting colors, textures, and recognizable features. By providing a wide variety of components that can be easily customized or extended, Tactile Town is an ideal starter kit for instruction and reinforcement of mapping skills and concepts.

The included large print *Teacher's Guidebook* (braille version available separately) provides 17 suggested layout activities that are presented in a progressive manner, from basic compass directions to a complex city block. Each activity has full-color photos and labeled sections. Other guidebook features include interactive games and a Concepts/Skills Checklist that can be completed for an individual student using the MS Word® file on the accompanying CD-ROM. APH Talking PC Maps Software

This software provides spoken and on-screen map data and 12 million points of interest for U.S. states, territories, and Canada on one flash drive. It speaks on any Windows® computer, whether or not the computer has screen reading software installed. APH Talking PC Maps is a joint venture of APH and the Sendero Group LLC.

This software does not give information about a user's actual physical location; it is not a GPS system. Instead, it provides a verbal description of physical space and what it contains. It gives persons with visual impairments the same information available to sighted persons through incidental learning when they look at maps, street signs, and signage on buildings.

This software helps your student:

- Virtually explore streets and learn their layout
- Set a destination and track the distance and compass heading to that destination
- Save, reverse, review, and print or emboss pedestrian or vehicle routes
- Track the side of the street that he or she is virtually walking on, and make realistic decisions about turns and street crossings
- Record or type custom descriptive information about a particular intersection, parking lot, building, or other location

Example Uses of APH Talking PC Maps software:

- **O&M Learning Tool:** Learn a new part of town: your O&M student can learn about the part of town to which his family will be moving.
- **Classroom Map Study Tool:** Explore Washington, DC: your student can be included in the classroom's virtual tour of Washington DC.
- **Incidental Environmental Learning and Location Literacy Tool:** Locate a business for occupational interviews: your rehabilitation consumer can locate and interview members of ten occupations with which he is not familiar.

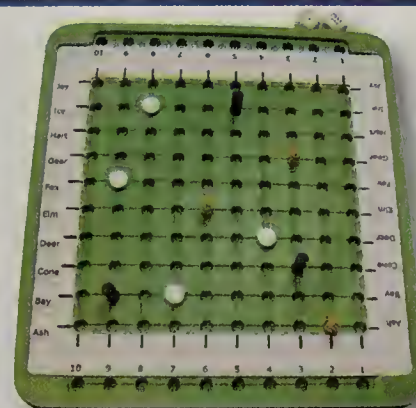

APH Talking PC Maps software, along with a User's Guide, is delivered on a USB flash drive. Technology-savvy students and adults can use this software with little assistance. Other students may need some instruction in its use.

Expanded Core Curriculum:

Assistive Technology and Electronics

Technology

Technology is a tool to unlock learning and expand the horizons of students. It is not, in reality, a curriculum area, but it is added to the expanded core curriculum because of the special place it occupies in the education of blind and visually impaired students. Technology can be a great equalizer. It enhances communication and learning and expands the world of blind and visually impaired persons in many significant ways.

MiniBook Braille Quick-Note Products

Jot down small bits of information quickly! When a friend gives you a phone number or a clerk tells you the total of your debit card purchase, you need to get to your braille writing materials *fast*!

APH's MiniBook gives braille users the ability to get materials out and ready to write as quickly as their sighted peers. Pull the MiniBook braille binder or spiral notebook out of your pocket and begin to write on the MiniBook Slate in just a few seconds!

A few things that you can do with MiniBook materials:

- Use your Binder for material that changes; you can easily remove, rearrange, and replace pages.
- Arrange appointment dates in your Binder and insert pages when you make new appointments.
- Keep a Mini Spiral Notebook, Slate, and Stylus by the phone to jot down quick messages.
- Use one Mini Spiral Notebook for each purpose: for example, one for your to-do list, and another for phone numbers.

Materials are sold separately:

- **MiniBook Slate with Styluses:** This tiny slate has four lines, 15 cells per line. The cells have side indentations, making it easy to find the dot you want to make. It comes with three styluses: saddle, tall flat, and short flat. Choose the one that fits your hand most comfortably.
- **Six Ring Binder for MiniBook:** This tiny six-ring binder comes with a pack of 250 sheets of punched filler paper. It fits into a pants or shirt pocket. Keep the slate fastened to the first blank page, keep a stylus in the binder's back pocket, and be ready to write in an instant. You can open the rings to rearrange pages or add new ones. The binder will hold up to 50 pages of braille.
- **Filler Paper for MiniBook:** Additional packs of filler paper can be purchased for the binder.
- **Mini Spiral Notebook (2-pk.):** Even smaller than the binder, the Mini Spiral Notebook includes 50 pages perforated for easy removal. Fasten the slate to the first blank page, then when you pull the notebook out of your pocket, you're ready to write!

Sudoku Partner 6x6

Sudoku Partner 6x6 is a portable, reusable board for setting up and solving 6x6 sudoku puzzles. Its advantage over other sudoku solving boards is that it allows you to mark possible answers in each box to help you keep track of them, without hundreds of separate pieces. It is also useful for those who don't know braille but still want a tactile system for solving the puzzles.

Like a standard print sudoku puzzle, the board has an array of small and large rectangles. Each *block* (large rectangle) is made up of six *boxes* (small rectangles)—three boxes across and two boxes high. Tactually,

the boxes are outlined in smooth raised lines and the blocks in heavier dashed lines.

It is especially important to make sure students can track left to right, up and down, and at the same time look for information tactually. Building success through gradual steps should keep the activity enjoyable for students.

Includes:

- Two puzzle-solving boards
- Booklets with rules, examples, and puzzles in print and braille
- 150 puzzles provided with answers, at three difficulty levels

Recommended ages: 10 years and up.

TREKS: The Game of Compass Directions

Designed to be challenging, educational, and enjoyable. Like a good walk outdoors, it's full of variety!

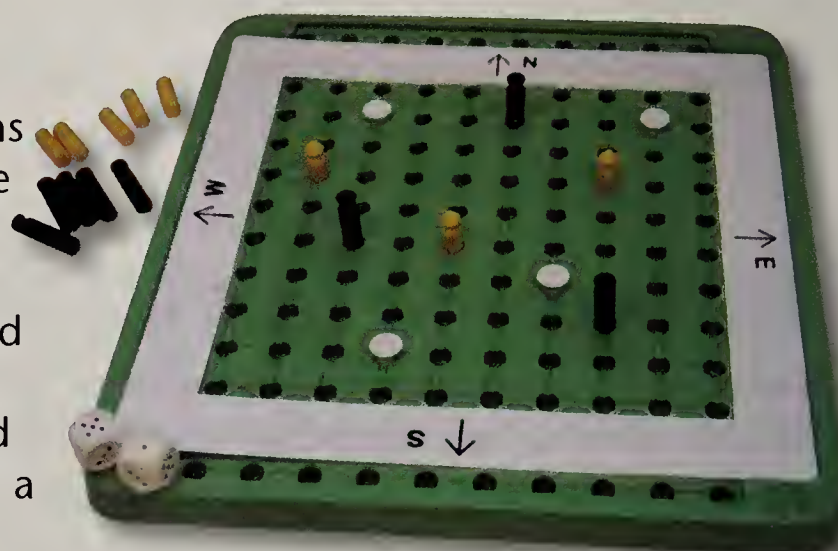

The goal of the game is to be the first player to move your pieces ("treksters") across the board from your home row into the opponent's home row. You can change the game to make the play simpler or add rules to make it more complex.

After each move, you must announce the direction and the number of spaces moved by each trekster. For example, "I moved this trekster four spaces east and this trekster one to the south." If you forget to make this announcement, your opponent may undo your move!

Includes print/braille overlays and pieces to use for varying the basic game:

- One overlay with the four cardinal directions labeled and another with only a north arrow.
- One overlay with numbered and named streets. With this game variation, you are required to name the starting and ending intersection for each move rather than the compass direction, as in "Moving from Third and Bay to Third and Fox" or "Moving from Second and Hart to Seventh and Hart."
- Buttons that serve as barriers to navigate.
- One overlay with the cardinal compass directions at the four corners of the square. By keeping the movement rules the same, you force all moves to be in secondary compass directions with this overlay. For example, if the north arrow is placed in the upper left corner of the board (from your vantage point), moving a trekster straight ahead is a move to the northeast; moving to the left is a move northwest; and so on.
- Two blank overlays (one that is open in the middle, one with two intersecting bands inside) to which you can add braille stickers to represent street names, street numbers, blocks, landmarks, lines of latitude/longitude, etc.

Along with the pieces mentioned above, the kit includes a game board, treksters that are tactually and visually contrasting, a rules and variations booklet in large print and braille, and a set of tactile dice.

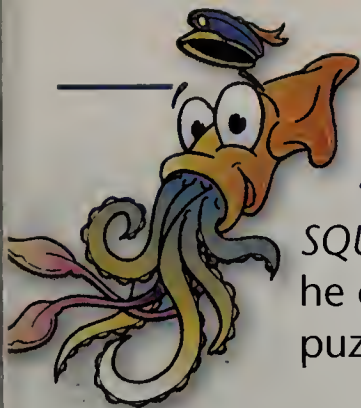

Recommended ages: 8 years and up.

- **UPS Overnight:**
Guaranteed next day delivery to street addresses only (**no P.O. boxes**). Additional charges for Saturday delivery. No Sunday or holiday delivery.

Note: Normal APH order processing time is 5-10 working days before a product is actually shipped.

Shipping Methods Outside of the U.S.: Certain items ordered by or for visually impaired people can be shipped to most overseas destinations via Free Matter for the Blind (surface mail). These include books, paper, and slates/styluses. The shipping charges for all other APH items must be paid by the customer. We recommend shipment by Priority Mail International, as surface mail is slow. All export and/or import duties, brokerage fees, etc., are paid by the customer. Please check with your customs broker to make arrangements in advance.

Two Ways to Order APH Software Products

APH offers two convenient ways to order most of our software products.

- Order the CD-ROM via website, toll-free, or mail.
- Purchase the program through **Digital Download**.
Download the demonstration version of the program from our website (<http://tech.aph.org>). Then phone our toll free number (**1-800-223-1839**) and give us your credit card number. Within 24 hours, we will give you a code key that transforms your demo copy of the program into a full copy.

Note: APH offers Demo versions of our software for you to try. Once CDs have been opened, they may only be returned if they are defective. To request a free Demo Disc containing software demos and accessible versions of APH catalogs, call **800-223-1839** or download demos at: <http://tech.aph.org>

Returns Policy

Defective Merchandise:

APH makes every effort to inspect merchandise before it leaves our facility. If by chance you do receive an item which is defective, we will repair or replace it at no cost to you (we reserve the right to choose whether we will repair or replace the item). In the case of items that have a specific warranty, we must be notified within one year of the date the item was shipped to the end user. In the case of items that do not have a specific warranty, we must be notified within 30 days of the date the item was shipped to the end user. For more information on warranties, please refer to the following section.

Other Returns:

We want you to be satisfied! You may return most APH products for any reason within 60 days of the date that the item was shipped from APH, subject to the following conditions:

- We require prior authorization for a return. Write or call APH Customer Service to explain which items you would like to return. We will give you a Return Authorization Number. When returning the items to APH, please write this Return Authorization Number on the outside of the shipping container. APH will refuse a product return if the Return Authorization Number is not written on the outside of the shipping container.
- When returning items to APH, include your original purchase order number or a copy of the original packing slip or invoice. This will allow us to process your return more quickly.
- Items must be nondamaged and in a resalable condition.
- A 10% restocking charge may be deducted from your refund. This charge will not exceed \$15.00 per item for individuals and \$50.00 per item for organizations.

Note: The following items may not be returned for any reason other than defects:

- Software: APH offers free demo versions of our software for you to try. Once you have ordered a full copy of the software, whether a CD or an electronic download, the software may not be returned. The only exception is that you may return a defective CD.
- Large print books (catalog number prefixes 4-, A-L, F-, L-, L-C, J-, or M-)
- Braille Books (catalog number prefix A-B)
- Thermoform Braille Books (catalog number prefix T-)
- Special-order items, including custom-made books

Limited Warranties on APH Products

All APH products are covered by a limited warranty. Certain products are covered by a warranty that expires one year from the date the item is shipped to the end user. All other products are covered by a warranty that expires 30 days from the date the item is shipped to the end user. Warranty does not apply in cases of customer modification, misuse, or abuse of APH products.

Repair Policy

If you are experiencing trouble with an APH product, please call our friendly customer service staff at **800-223-1839**.

Products Under Warranty

If your product is still under warranty, we will repair or replace the item at no cost to you (subject to some restrictions). Ship the product to us along with a written description of the problem.

Electronic Products Under Warranty - Return Authorization Number Not Needed

Unlike all other APH products, electronic products do not require a Return Authorization Number for an under-warranty repair. Please return these items to "Attn: Repair Department," 1839 Frankfort Ave., Louisville, KY 40206. **Note:** We can more accurately determine the problem for electronic products if you include all accessories such as batteries, battery clips, power adapters, and headphones; *however, please note that extended warranties do not cover replacement of these accessories.*

Please do not return the following products to APH: **Compact+ Hand-Held Electronic Magnifier, i-vu™ Hand-Held Electronic Magnifier, MaximEyes™ Video Magnifier, Orion TI-36X Talking Scientific Calculator, Primer™ Electronic Magnifier.** For these products call: **800-223-1839**.

Products Out of Warranty

Set Fee for Each Product

There is a specific, set repair fee for each commonly serviced APH product. The set fee allows us to more quickly and efficiently service your product.

The fee is to be submitted at the time the product is shipped to APH for repairs. Please be sure to include a written description of the problem. You may pay the fee with a check; money order; credit card; purchase order; or Federal Quota order. If you do not include the set repair fee, your equipment will not be repaired until the fee is received.

You will not be charged more than the set fee for a particular item no matter how extensive the necessary repair. Items which are not repairable will be returned to you.

If you have questions, please call Customer Service, **800-223-1839**.

Federal Quota Funds Could Help Purchase APH Materials for Your Students!

The federal Act to Promote the Education of the Blind provides funds for accessible educational materials for eligible students who meet the definition of blindness. An annual registration of eligible students determines a per capita amount of money specifically designated for the purchase of educational materials produced by the American Printing House for the Blind (APH). These funds are credited to Federal Quota accounts maintained and administered by APH and its Ex Officio Trustees throughout the United States and Outlying Areas.

Who Is Eligible?

In order for students to be eligible for registration in the Federal Quota Program, they **MUST** meet the following requirements:

- meet the definition of blindness – “central visual acuity of 20/200 or less in the better eye with best correction; a peripheral field so contracted that the widest diameter of such field subtends an angular distance no greater than 20 degrees; or visual performance reduced by a brain injury or dysfunction when visual function meets the definition of blindness as determined by an eye care specialist or neurologist.”
- “be enrolled in a formally organized educational program of less than college level”
- be enrolled with the registering school or agency on the first Monday in January

There is no chronological age limit for eligibility. “Eligible adult students are those who meet the definition of blindness and who are enrolled in instructional programs, at less than college level, for 20 hours per week. Social and leisure programs do not qualify as instruction. However, student practice to develop skills can be included in instructional hours. Registration will be determined by the number of students enrolled throughout the previous calendar year for at least three months of instruction (an accumulation of 12 weeks).”

Who Are the Ex Officio Trustees?

For each residential school for the blind, state department of education, or agency for the blind that participates in the Federal Quota Program, an Ex Officio Trustee of the American Printing House for the Blind must be designated. Each Ex Officio Trustee is entrusted with the administration of the Federal Quota Program within his or her system.

Want More Info?

For more information about the Federal Quota program, visit www.aph.org/advisory/index.html or call **1-800-223-1839**. On our website, you can find contact information for the Ex Officio Trustees in your state. These Trustees can give you the specific information about whether your student may qualify for APH materials purchased with Federal Quota funds: www.aph.org/fedquotpgm/trustees.html
